### Make a Request to Turnitin Support - Delete a Paper from the Database

A student submission can be permanently deleted from the Turnitin database so that it can no longer be used as a searchable source. For contractual reasons, all paper deletion requests must be submitted in writing by the Turnitin administrator.

To make your request, simply click the *Raise a Ticket* button at the bottom of this page.

Please ensure that the class ID, assignment name, and the submission ID associated with the paper is included.

You will then receive a ticket confirmation by email.

So that we can validate your request, you must respond to this email, which will allow us to match your 'reply to' address with the email address held on file for you.

Note: Rather than having to delete papers from the database, instructors may find it easier to create assignments that will not store submitted papers in the Turnitin database. They should select No repository when creating or amending an assignment. Click here for guidance on repository options.
